

# Language Services for Business

Since 1986, **Corinium Language Associates** has been providing language services to both corporate clients and private individuals, **helping to break down the international barriers posed by language and culture.** We offer a comprehensive range of language solutions, including customised language training, multilingual recruitment, and other associated services such as cultural awareness workshops, language testing and translation/interpreting.

## Customised Service

We aim to work closely with you to provide a high-quality service, tailored to your specific requirements. Whatever your language needs, our flexible, professional and friendly team will be pleased to provide a solution.

## Language Training

We offer training in a wide range of languages, including English as a Foreign Language, both for business and general purposes.

We recognise that learning a language often has to fit into your busy working schedule, so we can provide intensive, semi-intensive and on-going training, either delivered at your premises or our language centre, on a one-to-one or group basis. Course content, materials and teaching methods will be tailored to suit your needs.

## Multilingual Recruitment

We have an extensive country-wide network of candidates with excellent commercial skills and a high level of foreign language competence. If you are seeking to recruit language speakers for your business, whether for a single vacancy or an entire multilingual team, our professional recruitment will provide pre-screened, suitably qualified candidates on a no-placement, no-fee basis. Once selected, we can organise language tests for your candidates. We recruit for a wide range of vacancies, from entry level to management, for clients in diverse sectors and industries.
